

**PSYCHOLOGY**

**SECTION II**

**Time—50 minutes**

**2 Questions**

**Directions:** You have 50 minutes to answer BOTH of the following questions. It is not enough to answer a question by merely listing facts. You should present a cogent argument based on your critical analysis of the questions posed, using appropriate psychological terminology. You may plan your answers in this orange booklet, but no credit will be given for anything written in this booklet. **You will only earn credit for what you write in the separate Free Response booklet.**

**1. Part A**

Steve is in the kitchen happily making breakfast for his four children, who are all playing together in the living room. After hearing a loud crash, Steve becomes quite upset and rushes into the living room, where he sees a lamp shattered on the floor. The children are watching television, and no one is trying to clean up the lamp.

Explain how each of the following relates to the scenario.

- Soundwave amplitude
- Procedural memory
- Diffusion of responsibility
- Dispositional attribution
- Ghrelin

**Part B**

Instead of asking the children what happened, Steve immediately turns off the television and sends them all outside to rake the large amount of leaves in the backyard. Steve stays irritable for the rest of the day.

Explain how each of the following relates to the scenario.

- Authoritarian parenting style
- Steve’s high level of the Big Five trait of neuroticism

---

**Begin your response to this question at the top of a new page in the separate Free Response booklet and fill in the appropriate circle at the top of each page to indicate the question number.**

2. Michael is the regional manager for a car company and needs to give a presentation to the president of the company about how different management styles might relate to the total number of sales of the company's new electric car. He hires an industrial/organizational psychologist to study three stores, each in a different city. Each store's manager has their own distinct management style:

- In Store A, the manager has a supportive style (open and warm).
- In Store B, the manager has a strict style (rigid and severe).
- In Store C, the manager, who is Michael's good friend, has a distant style (permissive and disengaged).

The number of electric cars sold at each store over a five-month period is shown in the table.

	<b>ELECTRIC CARS SOLD BY STORE</b>		
<b>Month</b>	<b>Store A (supportive style)</b>	<b>Store B (strict style)</b>	<b>Store C (distant style)</b>
January	9	7	3
February	7	8	2
March	9	5	5
April	5	3	4
May	5	2	1

- Explain why this study is not a true experiment.
- Identify the implied dependent variable for the study if the study had been a true experiment.
- Calculate the mean of Store B's sales.
- Explain why the location of the store is a confounding variable in this study.
- Explain how the halo effect could influence Michael's interpretation of the findings.
- Explain why the hiring of an industrial/organizational psychologist was appropriate for this study.
- Explain how Michael could use positive reinforcement to help him finish his presentation by the deadline.
