

2003 AP[®] HUMAN GEOGRAPHY FREE-RESPONSE QUESTIONS

2.
 - A. Identify and explain ONE way that tourism has diminished regional landscape distinctiveness.
 - B. Identify and explain ONE way that tourism has enhanced regional landscape distinctiveness.
3. Over the last 150 years, Europe has changed from a source to a destination region for international migration.
 - A. Use the demographic transition model to explain briefly Europe's development as a source of international migrants between 1800 and 1920.
 - B. Identify and briefly explain ONE factor other than demographic transition that was responsible for Europe's development as a source of migrants to the United States between 1800 and 1920.
 - C. Briefly explain how THREE aspects of the demographic transition model account for Europe's transformation into a destination region for migrants from North Africa between 1960 and 2000.

2003 SCORING GUIDELINES**

Question 3

Part A (1 point)	- A decreasing death rate in Europe led to increased population. OR - Europe’s position in stage 2-3 led to increased population (implies the above).	
Part B (2 points)	Identify (1 point)	Explain (1 point)
	Collapse of agriculture	Potato famine; Irish migration (push)
	Economic	- Downturns, e.g., Norway, Sweden (push) - Job opportunities in United States (pull) - Recruiting, e.g., RRs in United States (pull)
	Cultural	- Religious persecution, e.g., Germans, Russian Jews (push) - Network connections/chain migrations (pull)
	Political	Instability, repression, lack of freedom (push)
Part C (3 points)	Aspects	Explain
	- Europe’s low BR/DR (stages 4-5) OR - Europe with aging population	- General labor shortage - Specific labor shortages (e.g., skilled, etc.) - Avoid population decline - Immigrants as scapegoats
		- General labor shortage - Specific labor shortages (e.g., skilled, etc.)
	North Africa’s high BR (stage 2)	- Overpopulation - Labor surplus

Note: In Part C, points are awarded for explanations derived from appropriate aspects of the demographic transition model.
